Summary

I'm a web developer with around 2 years of experience, mainly working on website design and development using platforms like WordPress and Shopify. I've also done an internship as a full stack developer where I worked on both frontend and backend tasks. I'm a quick learner and always open to learning new things. Currently, I'm looking to explore better opportunities to grow in the field of web development.

Education

JECRC University, MCA with full stack web development (IBM)	July, 2024
JECRC University, BCA with full stack web development	September, 2021

Experience

Operations Associate, App Pinnacle - Gujarat — December, 2024

- Handled daily communication with vendors and employees, addressing queries and updates.
- Ensured timely task completion and monitored workflow to support smooth operations.

Full Stack Web Developer, Compucom Software Limited - Jaipur — February, 2024

- Developed a Hotel Inventory Management System with an intuitive user interface for smooth and efficient management.
- Built the backend using Java and MySQL to improve inventory flow.

WordPress Developer, Blue Learn Stack - Banglore — August, 2023

- Contributed to building and customizing WordPress websites and enhancing themes.
- Optimized website performance to improve speed and user experience.

Web Developer, Client Projects — January, 2022

- Designed websites, logos, and branding tailored to client needs.
- Delivered creative digital solutions for a variety of global clients.

Projects

Nova – E-Commerce Website — 2025

- Developed "Nova," a MERN-based e-commerce platform with product listing, cart functionality, and user authentication.
- Tools Used: MongoDB, Express.js, React.js, Node.js

Women Tracking App – Womanly — 2024

- Built "Womanly," a safety-focused application leveraging data analytics to provide real-time alerts and identify high-risk areas for women. Promoted community support and actionable insights to enhance safety.
- Tools Used: React.js, Node.js, Transflow, Socket.io

Food Delivery Website-"Chillyy" — 2024

- Built a MERN-based food delivery website as a capstone project, focusing on full-stack development and user experience.
- Tools Used: MongoDB, Express.js, React.js, Node.js

Cryptocurrency Tracker Website – Major Project — 2023

- Collaborated on PRIOR Cryptocurrency Tracker using React.js and Firebase, demonstrating strong web development and crypto-tracking capabilities.
- Tools Used: React.js, Firebase, JavaScript

Virago – E-Commerce Website | SkillVertex Major Project   2022
- Built a responsive e-commerce website showcasing front-end development skills.
- Tools Used: HTML, CSS, JavaScript

Other Projects   2022
- Created business websites: Divine Stone, and WebClan, emphasizing user-friendly design and client needs.
- Tools Used: WordPress, Elementor, CMS Platforms

Achievements

Project work   2025
- Designed and developed 20+ websites for clients from various industries, according to their business needs and branding requirements.
- Clear communication with clients, ensuring timely delivery and positive feedback.

Team Coordination – Jaipur Literature Festival   2024
- Talked to visitors and encouraged them to share their feedback on books by the Literature Wing (Shri Akhil Bharatvarshiya Sadhumargi Jain Sangh).
- Helped the team manage interactions and make people aware of books based on Jain values and thoughts.

Team Leader – Smart India Hackathon (SIH)   2023
- Led a team on the problem statement "Development of an e-Portal for facilitating Case Management Hearing of various types of cases," creating a platform for clients and lawyers to manage hearings and receive updates, with SMS fallback support.
- Cleared the first round and contributed to both frontend and backend development of the web and Android-based application.

Coding Competitions and Technical Events   2022
- Participated in several coding battles, hackathons, and ideathons during college, gaining hands-on experience in competitive coding.
- Improved logical thinking, time management, and teamwork through real-time problem-solving challenges.

Internship Experience   2022
- Completed internships, worked on real client projects, designed pages, and managed back-end functions.
- Gained practical skills in website structure, front-end design, and back-end logic.

Skill Set

Languages: C++ , React.js, JavaScript
Tools: Wordpress, Shopify, SEO, VSCode
Soft Skills: Leadership, Teamwork
